Helping people to love their jobs

### The Quantum Lean Module, which delivers on a sustainable improvement culture

Quantum Lean is a modular system built on over 100 years of consultancy experience in and around the value-chain of many diverse organisations.

...but that experience is useless, unless transferred to the clients skillset. All Progress Coaches in our team measure the quality of their work on how swiftly they pass-on knowledge and develop internal competencies.

Lean Champions are internal consultants who take on the responsibility from day one of training for the continuous improvement in their area. Monthly workshops, coaching and training sessions enable them to master all Quantum Lean tools, whilst delivering their own first projects.

**All Quantum Lean Modules develop internal competencies to deliver sustainable step-changes in your organisations' performance**

## Lean Champions Modules 1 and 2

**LEARNING  
TO SEE**

- Lean Toolbox
- Data Driven
- Lean Ready!

EPAL

- > All good Lean Transfer programmes lead to a realignment of priorities, from a task-driven to result-driven approach
- > The Lean Champions programme is no exception. In each workshop, the Champions are provided with new tools to be applied directly in their own environment, reporting back and sharing best-practice success stories when they next meet.

**ADDRESS  
THE  
POTENTIAL**

- Responsibility
- Empowerment
- Ownership

EPAL

- > A value-driven environment relies on responsibilities which are both transparent and bought into
- > In addition to the theory and practical training in the Learning To See module, the Champions Programme sets a lot of emphasis on the purpose of each role and activity.
- > The result is a group who understand the benefits of a Lean approach and how to deliver them

**The first two Lean Champions Modules focus on the benefits of Lean, identify hidden potentials and deliver swift initial successes**

## Lean Champions Modules 3 and 4

### CULTURAL STEP- CHANGE

- Value-Stream Approach
- Lean Responsibilities
- Shared Learning

EPAL

- > As the programme matures, the projects which the Champions set themselves become increasingly ambitious.
- > The group gels and starts to work together to deliver ever increasingly impressive results.
- > Previously anecdotal assumptions are soon replaced with discussions and decisions based on facts and figures

### HARVEST FROM THE START

- Instant initial success
- The wins belong to the team
- Direct ROI

EPAL

- > The Champions earn their right to carry on my harvesting potential after each and every workshop and project
- > This success-factor sets a snowball in motion leading to ever increasing ROI and an unprecedented acceptance for Lean
- > Soon after, the responsible managers of each value-stream begin to demand Champion support within their own area

**Following the first two Lean Champions Modules, the third and fourth module harvest the true potential of the whole value-stream**
